

2025 Explorium Fall Report

Since the start of the new year, our programs have continued with exciting growth and impact. We're excited to share a few highlights from our work and to give you a glimpse into what's next.

Summer Day Camp

The summer was filled with exciting adventures, and several new activities. Many of the program additions are just the foundation for future success. Below are just a few highlights.

- Served 320 campers with approximately 70% being enrolled in Summit School District;
- An 10% increase in distributed scholarship funding totaling \$11,969 in scholarship distributions;
- We added kayaks, giving campers the chance to learn new outdoor skills and build independence;
- Included an overnight option, "Night at the Museum," that included kayaking, a museum visit, and a sunrise celebration.

School Year Programs

It's been an amazing start to the 2025-26 school year. Below are just a few highlights.

- 72% of the Upper Blue and 34% of the Breckenridge after school students qualify for free & reduced lunch;
- Supporting an increased special needs student body through increased staff training and improved teacher to student classroom ratio;
- A revitalized suite of STEM Enrichment programs funded by a variety of community funders.

Internship Program

In the winter of 2025, we launched a paid internship program that provided two students, Josceline Ortega and Sheccid Ramirez Solis, with extensive training and hands-on experience. Both have now successfully begun their freshman year of college, pursuing degrees in education.

Why Mountain Top?

"I can say without exaggeration that I would not have been able to live and work in Breckenridge these past three years without Mountain Top."

-Natalie Munson, Camp Parent

Plan for the future

We are working on plans to expand our programming and continue to serve our community in new and impactful ways.

- **Leadership Programs** - It started with a paid internship program and is evolving into a collection of programs teaching leadership.
- **Robotics** - After school robotics courses starting in January of 2026!
- **Explorium Children's Museum** - Our next focus is bringing an updated LEGO exhibit.
